Iventory

As an Inventory Manager
- I want to approve or reject stock adjustments so that only valid adjustments are applied.
- I want to monitor stock levels so that I can anticipate shortages or overstock.
- I want to manage product categories so that I can organize inventory more effectively.
- I want to generate inventory reports so that I can analyze trends and support decisions.
- I want to set reorder points so that the system can alert me before stock runs low.

As a Warehouse Staff
- I want to manage products so that I can keep product information accurate and up to date.
- I want to manage stock counts so that I can verify physical inventory against system records.
- I want to manage stock adjustments so that I can correct stock discrepancies.
- I want to manage stock transfers so that I can move inventory between locations when needed.

As a Purchasing Staff
- I want to manage reorder stock so that I can replenish inventory when needed.
- I want to select reorder location so that I can direct shipments to the correct warehouse.
- I want to view supplier information so that I can choose the best supplier.
- I want to track purchase orders so that I can follow up on pending deliveries.

As a Sales Staff
- I want to view stock availability so that I can provide customers with accurate delivery times.
- I want to view product pricing so that I can prepare accurate sales quotes.
- I want to reserve stock so that I can ensure availability for confirmed sales orders.

As an Accountant
- I want to track inventory valuation so that I can reflect accurate asset values in financial reports.
- I want to match stock movements with financial records so that transactions are consistent.
- I want to review adjustment impacts so that I can assess their effect on financial statements.
